news from the plebiscite districts in upper Silesia tonight was received by cheering thousands guthered in an open area meeting here. The celebrators improvised an altar at which prayers were offered for the territory they believed had been regained for Poland after a separation of more than six hundred years.

The meeting was called by enthusi ests among the population, notwithstanding the fact that the late editious of the newspapers showed the returns upon which the rejoicing was based were unofficial and incomplete. The meeting was attended by members of the government and representatives of the diet, the army and the clergy.

The plebiscite news caused the biggest jump in months for the Polish mark, the quotation moving from 860 to 950 for the dollar.

Southern Sections Favors Poland Returns from Sunday's plebiscite in upper Silesla, reported Monday; from derman sources, indicated a vote for the whole territory on a scale of about CLEVELAND - Children of the 3 to 2 in favor of Germany. These advices were borne out in large stuged a playlet for Rotarians at the measure by returns through London Monday night, which reported the upper Silesian vote generally in favor of Germany, but that sections of the territory, notably the southern section and to the east and the south of the line running from Rosenberg to Krappitz had voted in favor of Poland.

The latest German advices indicate lessening of the feeling of jubilation that was reported throughout Germany as a result of the returns frem the voting, a lesser degree of Cerman preponderance than was 'ex pected being shown,

It had been pointed out by the Berlin press, likewise, that under the treaty, the entente has the power to take into consideration the voting by Communes and the economic relations of the various sections, some of which, it was felt, might be awarded to Poland, notably certain regions which are regarded as highly important to German industry.

NEW YORK, March 22.-Opening of a fight to earb the traffic of an international drug ring, said to be headed by business men of Germany, Japan and England, was announced here today by Dr. Carleton Simons, special deputy police commissioner. Declaring high ranking officers, of and Mediterranean and South Ameri-

steamships plying between New York can ports have been transporting drugs to this country, Dr. Simons said many raids are planned and developments of a startling nature expected. The crews of six steamships now are under surveillance he added. The deputy police commissioner

said the leaders of the ring had been identified, but that action against them was impossible as the laws of their countries do not prohibit trafficking in nargotics. Drugs manufactured in Germany, it is charged, have been carried from that country into Switzerland by means of underground passageways which have been these drugs, Dr. Simons asserted, have Japan and Italy.

Biggest Part Of Country On Friendly Terms With Overcoats

WASHINGTON, D. C., March 22.-Winter still lingers in the lap of spring government weather experts find, despite the summer-like temperatures of the last day or two. The forecast for tomorrow was generally fair weather east of the Mississippi, but frost tonight in the Ohio valley and middle Atlantic states north of Virginia, and freezing temperatures in the north Atlantic states and about the Great Lakes.

WASHINGTON, D. C., March 22.—The beginning of spring vestorday. yesterday brought to the Atlantic coast region of the United States the highest temperatures ever recorded for March 21, but today there is a different story to Hastily discarded overcoats have bene brought back to

use and the east is shivering in the threes of a severe cool wave. Washington yesterday lead nearly a dozen cities in the coastal region with an official temperature, as measured by goveriment thermometers of 99. The capital sizzled and sweltered as

in mid-July.

New York reported a record March 21st temperature of 80: Philadelphia, 82; Boston; 82; Hartford, Conn., 82; Portland, Maine, 78; Rallimore, 88; Raleigh, N. C., 86, and Norfolk, Va., Températures declined even

faster than they went up, a coolwave having overspread the cutire section of the country east of the Mississippi and even extending beyond that river as evidenced by snow in southwest Kansas and freezing weather in the Texas Pan Handle. Moorhead, Minnesota, reported only 19 decrees above zero.

tic services now progressing at Bigelow Church is decidedly deepening as they enter upon the third week of the Demarest campaign. This interest was very evident in the service last night, a spirit of sincere conviction making itself strongly felt throughout the audience, resulting in a number coming to the altar for deeper consecration, as well as those who came to seek for the first time a Savier. Many have spoken of the manner in which Mrs. Demarest has appealed to church members of long standing for more genuine evidences of their own personal relation to Christ. What she has already done for both churches in inspiring them to more of a living faith and daily evidences of Christian living, is beyond esthnate.

"The Heart of Christianity" was the theme of the evangelist's sermon last night, and she had not progressed far in the unfolding of her subject until it was evident she was touching the heart of her audience. In her that "Christianity Is just 'Christ." Mrs. Demorest took her text from

equal to two spoonfuls of many other baking powders

Calumet Baking Powder has more than the ordinary leavening strength—therefore you use less. It is by far the most economical baking powder.

You pay about half the amount asked for high-priced brands. It goes twice as far as most other brands—so you save when you buy it—you save when you use it. But the most important economy of

CALUIVIET WAR BAKING POWDER

is in its superior quality. Regardless of price, Calumet is the highest grade baking powder made. It is absolutely pure in the can—in the baking. Leaves no harmful residue.

Calumet, wherever placed, always gives satisfaction. It is the largest selling brand of baking powder in the world and is made in the largest, cleanest, most up-to-date Baking Powder factories in existence.

The millions of housewives who use Calumet secure better bakings at a more economical cost than those who do not use it.

With all this evidence of superiority—with all this proof of better baking why should you be satisfied to stand the exorbitant expense of over priced powders or the faults and failings of cheap, inferior brands. You shouldn't -and you won't-after one Calumet bake-day trial.

Beware of This—

When you buy a pound can of Calumet, you get a full pound—16 ounces, no short weights. Some baking powders are now being put on the market in 12-ounce cans instead of pound cans. Be sure you get a pound when you want it. Remember Calumet is not made by a Trust—not

Let Us Fill Your Apparel Needs For Easter

Easter - day of lilies, sunshine, the first breath of Spring. A new hat, coat, suit or dress. Will yours, of such apparel, be all that you have dreamed? Will it be the expression of your own individuality? Will it be the style, the art, the material - that was made for you? It can be, and it will be, if you will take (we almost said trouble, but instead its a pleasure) the time to make your choice from the charming new spring models. Quality and wear expressed in terms of material. Style, dash, charm expressed in terms of tailoring. And all expressed in terms of value that will astonish you. The earlier you call the wider your choice.

SUFFER WITH NEURALGIA

Use Soothing Musterole

When those sharp pains go shooting through your head, when your skull seems as if it would split, just rub a little Musterole on your temples and nack. It draws out the inflammation, soothes away the pain, usually giving quick relief. Musterole is a clean, white ointment, made with oil of mustard. Better than a mustard plaster and does not blister. Many doctors and nurses frankly recommend Musterole for sore throat, bronchitis, croup, stiff neck, asthma, neuralgia, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muzcles, bruises, chilbiains, frosted feet—colds

Do not be deceived by cans containing syrup that might look like Karo. The uame "Karo" is on every can of original Karo—look for it and be essured of full weight cans and highest quality. BLUE Karo The standard table syrup. Also for cooking, clog and candy making. Light brown color, icious flavor—a heavy-bodied syrup.

RED Karo The Ideal Syrup for every use—for cooking, baking, eachy making and preserving. Because of its inney-like appearance many prefer it as a spread for cakes, biscuits, breads.

GREEN Karo Flavored with highest grade real maple sugar. Very moderate in price—absolutely pure. The makers of Karo are the world's largest users of the highest grade maple sugar—over a thousand tons used anoually

NEW YORK, Mar. 22-Encouraged ferred, Tobacco Products and Searsby yesterday's late reaction, shorts re-lated their aggressive operations at 2 to 3 points, and General Asphalt, the the opening of today's stock market most active feature of the morning, reflecting further losses in a majority acted to 1%. There was little demand of the popular shares. Cruelide Steel lost one point and large fractional reessions were made by Mexican Pe-troleum and Pan-American Petroleum, United States Bubber, Canadian Pacife and New Haven, Studebaker, General Asphalt, Endicott-Johnson and several unimportant speciallies were included among the few firm issues. A steadier tone developed within the first half hour on the improvement shown by oils.
On the early rebound, oils and ship-

pings as well as food and textile spec-ialties were carried 1 to 2 points over yesterday's final prices, some of the ruits, notably the Hill issues, also strengthening. Excepting Atlantic Gulf, gains were largely or entirely cancelled before noon, steels, motors coppers, tobaccos and low priced rails

The Transcendent Christ

It is one of the credentials of Christianity that no one has ever succeeded in putting it into operation. A religion that could be applied to life as a set of blueprints if applied to a building would be a poor and unsatisfying

The glory of the Christian ideal is its alluring inaccessibility. It leads the seeker from one summit to the other, always rewarding him with new visions and ever inciting him unto higher conquests. On the height of heights, overtopping the world, stands Jesus, the Christ. To His moral elevation no man may attain, yet in striving to attain it any man shall find strength and blessedness.

He is a foolish man who criticises the church because it does not live up to its Master's teaching. The church is composed of imperfect men and women, who join themselves together in a Christian community because they realize their imperfectness. The church is

not what it should be and you are not what you should be - in these two facts lie the reasons why the church needs you and why you need the church.

"Not that I have already laid hold of it, or that I am already made perfect," says Paul, "but this one thing I do - forgetting what lies behind and straining every nerve for that which lies before, I press forward toward the mark....

That is Christianity at its best.

WHERE THE MONEY GOES

ERHAPS you belong to the class of Americans so fortunate as to be required to pay a direct income tax, and if so you may be interested in knowing what will be done with each dollar you have so patriotically contributed to the cost of the

The United States government has a man who is a calculator of more than ordinary ability, and it is something or a hobby of his to study government statistics and make comparisons that at least have the merit of interesting himself. That man is Herbert D. Brown, chief of the United States bureau of efficiency.

Mr. Brown has made calculations of the expenditures of the federal government for the fiscal year 1921, and he has discovered that 68 cents of every dollar you pay to the government goes to pay for past wars interest on the public debt, pensions and other obligations incurred by past military activities.

Twenty cents of each dollar paid to the government in taxes is for the maintenance of the army and navy-preparations for war which may or may not come, but which congress thinks the nation should be prepared to meet. The remaining 12 cents of each dollar is devoted to all other activities of the government.

Perhaps you have had a disposition to criticize the nations of the old world for spending so much of their money for military purposes, but it would be difficult for any of them to spend more money than the United States is for wars past and prospective.

The obligations ereated in the past must be paid, and the only hope of relief lies in a reduction from the 20 cents being devoted to preparedness. Navy building will go on, however, for some time, and huge sums will be needed for this purpose. Education, good roads, betterment of postal facilities and other constructive activities suffer because America—the great peace nation—spends 88 cents of each dollar for war.

LONG, LONG AGO

OME day in this restless age we shall stop for a spell to make up a list of the fast disappearing things which were in their own day so common to the fast disappearing things which were in their own day so common to eye and car that we scarcely noticed them. Which does not mean that they were not dear to us in the days of their glory. When that list is made up, it will be found to be longer than the longest list of grievances of the ultimate consumer against the profiteer.

Occasionally we find these things in novels which tell of the days of our grandfathers; sometimes a critic of the present order, looking in vain for something he once held dear, calls our attention to the fact that it is with us no more. Such a one entered a plaintive protest recently over the fact that the old time livery stable is today as rare as the dodo bird. "Many times," he says, "farmers have to drive their teams several miles to find in town a place where the horses may be cared for during the noon nour.'

It is a restless age, and a changing one. The log cabin candidates, once so dear to the heart of the voter, where are they? The torchlight processions on the eve of presidential elections, once the delight of every small boy who came in this way in his own right into the possession of a torch—these, too, are gone.

The old caken bucket, the rail fence, car muffs, the dicky, gay deceiver, which looked like a shirt but wasn't, having to rely on coat and vest for support in its deceit-most of us know of these things now only by hearsay or from the memories of persons now departed. More recently the brass rail has gone from among us to the great regret of nearly half of our adult population. The village blacksmith is still with us, to be sure, but he is going into decline; he carries tires and automobile accessories as a side line, and the clang of his anvil is not what it used to be.

When a list of these things, to which any reader may add at will, has been completed, it may be that social scientists will interpret the significance of their disappearance. Until such time, however, we shall mourn that, like Clementine of the heart-throb song, they are "lost and gone forever."

FOREST FIRES

HE greatest menace to reforestation and conservation of our woods is the forest fire. The forest fire not only destroys timber growth, but endangers human life; robs the soil of its fertility; dries up our streams; is the starting point of soil erosion; kills game and fish life and creates, in most cases, useless waste land.

All forest fires are not preventable, but in the main they are the result of carelessness or negligence. Man can not control the elements. Lightning and spontaneous combustion cause a few of our forest fires, but the careless hunter, fisherman or camper, together with the negligence of the settler, contribute by far the greater menace to our forests. The forests of our state are as necessary to our welfare as the raising of crops. And the devastation wrought by the forest fire is a greater hardship on the community than on the individual.
